DETAILED ACTION

Response to Arguments

The restriction is repeated and made final.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 1 and 11, the broad term used in lines 3 and 10-11 does not define the meets and bounds of the invention. Reading the claims in its broadest meaning when the message arrived to the vehicle, it will be impossible to perform the task mentioned in lines 12-14.

3. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Dominke et al (6,154,688).

As per claims 1 and 11, Dominke discloses how to integrate the diversified pieces of information and providing each of the integrated pieces of information with a priority order indicating an importance of each piece of information (column 2, lines 43-51). Moreover, Dominke discloses one or more pieces of information generated in the vehicle, allocating an appropriate resource selected from the diversified resources for using that information according to the priority order (column 2, lines 52-67).

Claim Objections

7. Claims 1 and 11 are objected to because of the following informalities:

Art Unit: 3661

a) Minor grammatical error- Line 6 of claim 1 says 'each information', where the information is not countable. It should say each piece of information. The same problem appears in claim 11, line 8. Appropriate correction is required.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Dominke et al (6,092,006) discloses a hierarchy system for controlling a vehicle.
- Avila et al (6,256,557) discloses a vehicle data bus communication protocol and method.
